MARCHIONESS OF LORNE.

Of a rich, shining rose-color, shaded with vivid carmine. It is especially remarkable among H. P.'s for its perpetual flowering: nearly every shoot producing a flower. Extremely fragrant; a splendid grower and very free from disease. The finest garden rose of its color that has yet been introduced. See page 2.
To Our Customers!

Present and—Hoped For.

In presenting our Spring Trade List this season, we wish to express our sincerest thanks to our many kind patrons, both for their much valued patronage and for their appreciation of our efforts to give entire satisfaction, as testified by the many flattering and unsolicited testimonials that we have received. It is now some seventeen years ago that we first commenced in a small way growing a few vines and plants for nurseriesmen and dealers, and having been from the very start so fortunate as to give satisfaction to our customers, we have steadily increased our planting and sales every year. We now, while not the largest concern in the business, have as complete a plant as can be found, and every appliance for the successful promotion of our business. We have one of the most skillful propagators in this country, some half-acre of glass, large and improved cellars, commodious packing grounds and sheds, and are thus enabled both to grow stock of the finest quality and to fill orders quickly and accurately.

Our grading is done by experienced men who thoroughly understand their business, and is guaranteed to please. The fact that a large proportion of our first customers (those who are still living and in business) have been on our order-book every season up to the present time, is very gratifying proof of their satisfactory dealings with us, and enough to assure those who have never ordered from us that they will be well treated.

While we also grow a general assortment of Nursery Stock, our principal attention is given to choice specialties in the ornamental line, such as Fine Hardy Roses, Clematis, Flowering Shrubs and Decorative Trees. We have correspondents in Japan and the principal countries of Europe, through whom we are continually obtaining such new varieties as promise to be of especial value, and we also have from time to time new things of our own originating, all of which are thoroughly tested before being put on the market. Our propagation and planting include Hybrid Perpetual, Moss and Climbing Roses, Clematis, Ornamental Shrubs and Trees, Evergreens, Grape Vines, Ourums, Gooseberries, and other Small Fruit Plants and Fruit Trees.

PRICES.—Our expenses being quite moderate, we are able to offer strictly first-class stock at very low prices. We do not price our lists by items, for the reason that we can usually make better prices when a customer advises us of his exact wants in the various lines or varieties than we can by pricing items separately.

PACKING.—We make no charge for packing, beyond the actual cost of the boxes, which we make ourselves, and at the lowest possible figure. Our charges for boxes will be found to be much less than those of most other firms.

SHIPPING.—We have the New York Central, the West Shore and the Pennsylvania Railroads, and can ship in any direction with the surety of prompt arrival at destination. We also have a special arrangement with our freight agents that every shipment be followed with a tracer, so as to preclude the possibility of delay. The express companies represented here are the American, the National and the Adams.

TERMS.—Bills for Full shipments are due December 1; for Spring shipments, June 1; except with parties who are unknown to us and unrated by the Mercantile Agencies, when remittances must precede shipments. All offers are subject to stock being unsold on receipt of orders.

GUARANTEE.—We use the greatest care possible to have our stock true to name in all instances, and should any prove not true, we stand ready to replace it free of charge, or to refund the purchase price, but do not hold ourselves liable to other damages than are herein named, and all our sales are made with this understanding.
Hardy Roses have been our leading specialty for fifteen years. There are none better grown.

**ROSES.**

**SPECIAL VARIETIES.**

**CRIMSON RAMBLER**—The new climbing Polyantha from Japan.

Dormant Plants 1 From deep 2½ inch pots. $7.00 per 100.
Growing Plants

---

Special rates for large quantities on application.

A wonderful new Rose from Japan, bearing immense trusses of deep crimson flowers, which hold their beautiful color a long time without fading. The plant is a very vigorous grower and thus makes a splendid climbing Rose, though it may also be grown in bush or pillar form. When in full bloom and covered, as it is, with its great trusses of flowers, containing thirty to fifty blossoms each, it is a most magnificent sight. It has proved entirely hardy in this country, and is a very great acquisition to our garden Roses.

FOR NURSERY PLANTING the dormant plants are especially adapted on account of the much greater ease and safety with which they can be shipped and handled. These that we offer are well-grown plants of last spring’s propagation, which we have put away in cold-frames and allowed to become dormant for just this purpose. The Crimson Rambler is the greatest acquisition for many years, and as soon as it becomes well known, it will be in still greater demand than now.

NO NURSERYMAN OR FLORIST SHOULD BE WITHOUT AT LEAST A HUNDRED OR TWO TO PLANT OUT. THEY WILL MAKE FINE STRONG STOCK IN ONE SEASON.

Lithograph plate and descriptive circular sent free upon application.

**CAROLINE MARNIESSE**—A hardy Rose that is *always* in bloom. Strong field-grown plants, $10.00 per 100. One year field-grown plants, nice stock, $7.00 per 100.

**AS A BEDDING ROSE** this variety has no superior. It is literally a *continuous* bloomer. In our nursery the past season, at times when other Roses showed only scattering blossoms, or none at all, the rows of Caroline Marniesse were a perfect mass of flowers. **There was not a week from the latter part of May 'til the middle of October that large quantities of blossoms could not have been picked from these plants.**

The blossoms are blush white, small but full, and borne in very pretty clusters. The bush is low growing about 18 to 24 inches, and especially adapted for a border. It is *entirely hardy*, having withstood in our nursery, unprotected, a temperature of eighteen degrees below zero, without the least injury.

**FLORISTS WHO SELL POT-ROSES** should buy some Caroline Marniesse. They will form a perfect mass of buds and bloom in a short time, and will meet with ready sale. It is much more free blooming than Clothilde Soupert that has been so much esteemed for this purpose.

Descriptive circular on application.

**MARCHIONESS OF LORNE**—Hardy and vigorous, yet as beautiful, fragrant and free blooming as a Tea Rose. Extra strong field-grown plants, $10.00 per 100.

This is a perpetual blooming Hybrid of the greatest excellence. It is perfectly hardy and of very vigorous habit, but yet combines with these qualities all the beauty, fragrance and delicate texture of the finest Tea Roses. It is especially remarkable for its perpetual habit, nearly every shoot being crowned with a blossom. The flowers are of an exceedingly rich rose-color, slightly shaded in the centre with carmine; very large and of a handsome cupped shape. The buds are long, pointed and especially beautiful. The finest garden rose of its color. See the half-tone cut, from photograph, on first cover.

Have you noticed the tree-form Hydrangea on back cover. We have some of the handsomest plants ever seen. Also bush-form.
**OWN-ROOT Roses are superior to budded plants.** We bud only those varieties that will not grow from cuttings.

**ROSES.**

**GENERAL LIST.**

HARDY ROSES have for many years been our leading speciality and we take no little pride in the grade of the stock we send out. Our plants are strong, two-years-old, field-grown stuff that will average two feet high or more, except in some of the more moderate growing kinds; are clean, vigorous and healthy, well-branched and with good roots. The list given below is but a small part of the assortment we grow, as in many varieties we are already sold out, but it still contains a good selection.

ROSES ON THEIR OWN ROOTS are becoming more and more in demand every season. To meet this demand, it is our practice to grow from cuttings all varieties that can be advantageously propagated in this way. In some of the Mosses, and a few other valuable kinds which will not root from cuttings, we, of course, have to offer budded plants. They are worked low on Manetti stocks and kept free from suckers. To our customers who do a retail business, however, we cannot too strongly recommend own-root Roses. With the average amateur rose-grower, it is, in nine cases out of ten, a question of only a year or two before "suckers" from the "stock" of a budded rose entirely run out the variety budded in. The planter then has nothing but a wild Manetti rose, and, not knowing that he should have cut away the "suckers," thinks he has been swindled by the one of whom he bought.

Never and Rarer Varieties printed in Broad Faced Type.

* Our Own Roots.
* Budded Plants.

*Baltimore Belle, cl.—Pale blush, almost white; double, a profuse bloomer.
* Caroline Marnissie, noisette—See page 3.
* Climbing Jules Margottin, hyb. cl.—Bright carmine-rose; good size.
* Climbing La France, hyb. toto—A sport from La France with flowers like the latter, but a somewhat more vigorous grower.
* Climbing Victor Verdié, hyb. cl.—Bright rose; very desirable.
* Clothilde Soupert, poly.—Pearly-white with rose center; remarkably free flowering.
* Coquette des Alpes, hyb. nois.—White, slightly shaded with blush.
* Coquette des Blanches, hyb. nois.—White, just tinged with cream.
* Duchess of Albany, hyb. toto—A rich deep pink.
* Eliza Boelle, hyb. nois.—White, delicately tinged with pink.
* Gen. Jacqueminot, h. p.—Bright shining crimson; very rich and velvety.
* Gracilis, moss.—Deep pink. The most beautiful of all the mosses.
* Jules Margottin, h. p.—Carmine-rose, large and full; free blooming.
* Madame Joseph Desbois, h. p.—Flesh-white shaded with salmon-rose. Very large, well formed; a very vigorous grower. This is one of the most superb roses of recent introduction.
* Madame Plantier, hyb. China.—Pure white; a profuse bloomer.
* Marchioness of Lorne, h. p.—See page 3.
* Meteor, hyb. toto.—Rich velvety crimson.
* Mrs. Cleveland, h. p.—Delicate waxy flesh-color; very fine.
* Mrs. Degraw, bour—Rich glossy pink; very fragrant and a remarkably prolific bloomer. We have found it entirely hardy, even in this severe climate.
* Perle des Jardins, toto.—A beautiful straw color. Strong field-grown plants.
* Princess Adelaide, moss.—Pale rose or pink; very good in both bud and flower. In hardiness and vigor of growth it is unsurpassed. It makes a strong symmetrical bush six feet high or more, unless trimmed back, and can be used very advantageously for a hedge, the effect of which is most striking and handsome.
* Queen of the Prairies, cl.—Rosy-red, frequently with a white stripe; good size, double. A very vigorous grower and free bloomer. A large stock of fine strong plants for this season.

Better secure a few hundred Crimson Ramblers for planting out. The most wonderful horticultural novelty for many years.
We do not price our general list, for the reason that we can usually quote better prices when we know the exact wants of a buyer in the various lines or varieties, than we can by pricing items separately. In writing for prices, state quantities wanted as far as possible.

**LIGHT GRADE ROSES.**

**For Nursery Planting.**

For common kinds, $4.00 per 100; $80 per 1,000.

**Special List of These Sent Upon Application.**

We can furnish light grade Roses in many of the varieties given in the preceding list and in some other kinds. They are nice thrifty plants, taken from the same blocks as our first-grade and only a little lighter. They are suitable for lining out in nursery rows, where they will make fine strong plants in one season, or are good enough for immediate use anywhere that an extra heavy grade is not required. Will make fine stock for mall orders. Send for corrected list of them.

**CLEMATIS.**

We venture to say that we propagate more Clematis than any other establishment in this country, if not, indeed, in the world. Our supply of large plants for this season is somewhat limited however, owing to our having sold so many young plants to other nurseries as to run us somewhat short upon our own planting. We offer limited quantities, both of strong first-class plants and nicely selected lighter grade, in the following varieties.

**Duchess of Edinburgh**—The best double white.

**Grand Duchess**—Single white; very large.

**Graveolens**—Bright yellow; flowers through the late summer and early fall until frost comes. Single flowers, about the size of Paniculata; a very rapid and vigorous grower and entirely unaffected by the blight that caused such havoc among many other varieties. Very desirable.

**Henryii**—Single white; large and showy.

**Jackmanni**—Single purple; well known and justly popular.

**Kermesina Splendida**—Single red; very vigorous and free from disease.

**Mme. Grange**—Single; a deep purple with crimson tinge.

**Mme. Edouard Andre**—Single red; this is the only large flowering Clematis of a decided red that has yet been introduced, and it is a most valuable acquisition.

**Paniculata**—Single white; of extremely rapid growth with large, dark, shining green leaves and a profusion of flowers which are small but borne in large panicles and delightfully fragrant; after flowering the seed pods assume a handsome bronze tint.

**Ramona**—Single, lavender-blue; very large and fine.

**Extra Heavy Three-Year Old Plants**—A very limited quantity of these to offer in the following varieties:

| Henryii | Jackmanni | Ramona |

---

**Clematis for Nursery Planting or for Mailing.**

These are nicely rooted plants that were propagated from cuttings last spring. They were potted into deep 2½ inch pots and grown in our greenhouses for about seven months, or until well established, and then allowed to become dormant. Then they were taken out of the pots and carefully packed away in cold-frames for spring deliv-

A yellow Clematis should be a good seller. The flower is small, but very pretty. Graveolens is its name.
Send us lists of your wants. Our prices will usually be found the lowest that are compatible with high grade stock.

We find they are much more likely to succeed if handled in this way than if planted directly from the greenhouses in a growing condition, and they also stand shipping much better.

Prices (except as noted below), $6.50 per 100; $55.00 per 1,000.

**VARIETIES.**

**Duchess of Edinburgh.**
**Grand Duchess.**
**Henryii.**
**Jackmanni.**
**Lanuginosa Candida—** Single white, large and fine.
**Magnifica—** Single, reddish-purple.
**Mme. Ed. Andre—** $15.00 per 100.
**Paniculata—** $4.00 per 100.

These plants, with the proper care and conditions, will most of them make marketable stock in one season. We have a large trade upon them among other nurserymen, and have prepared a large and fine stock especially to supply this demand.

We have one of the finest collections of Paeonias in this country, having secured the finest varieties from both Japan and Europe. Our assortment for next spring is now much reduced by the large sales we have had during the summer and fall, but we can still furnish some very fine sorts in the above colors.

**Tree Paeonias—** Strong two-year Plants.
**Banksi—** Rosy blush with purplish centre.

**Ornamental Shrubs and Twining Vines.**

In this line our stock is of the finest quality. It is all young, clean and thrifty, but strong, well branched and well rooted. Nothing scrappy and overgrown.

**Althea, Double Blue.**
" " "Double Purple.
" " "Red.
" " "Variegated—Double purple flowers and handsomely variegated foliage.
" " "Double White.

We have a large and very fine stock of Altheas this season, especially the Blue, Purple and Variegated, upon which we can quote very favorable prices.

**Ampelopsis, Veitchii, (Boston or Japan Ivy.)—** 3 years, extra fine.
" " " "2 years, strong.

The finest climber for covering walls, to which it will cling without support, and form a dense solid sheet of glossy green.

**Quinquefolia, (American Ivy or Virginia Creeper)—** 3 years, strong.

Do you want to grow your own Hydrangeas? We can supply small plants, splendidly rooted, that are sure to succeed. Japan Snowballs, too, and Ampelopsis Veitchii and Clematis.
The Hardy, CONTINUOUS BLOOMING, Noisette Rose,

CAROLINE MARNIESSE.

Blossoms without Cessation from June till October.

A Good Cemetery Rose. :::: Unequaled as a Perpetual Bloomer.

BLOSSOMS ARE WHITE AND PRODUCED IN PROFUSE MASSES.

PERFECTLY HARDY - - - - -

::: NEEDS NO PROTECTION WHATSOEVER.

Read the Description on the Other Side.

Strong Plants for Blooming the First Season.

We will furnish, free of charge, to reliable nurserymen who will push the sale of this valuable Rose, 1000 of these circulars, with business card imprinted in this space, with every order for $10 worth of plants, as long as our stock lasts.

Strong Field-Grown Plants...........................................$10 per 100
Smaller Field-Grown Plants (nice stock).............................$6 per 100

JACKSON & PERKINS, Rose Growers,
NEWARK, Wayne County, NEW YORK.
The CONTINUOUS BLOOMING, Hardy Noisette.

CAROLINE MARNIESSE

A Most Valuable Rose For General Cultivation.

The Caroline Marniesse, although originated some years ago, has never become well enough known to receive the general cultivation that it so richly deserves.

As a Perpetual Bloomer we have never found its equal. Even during a recent dry season, when most of the other so-called perpetual bloomers were so affected by the drought as to show scarcely any blossoms, the rows of Caroline Marniesse were a continuous mass of bloom. There was not a week from late May till the middle or latter part of October that large quantities of blossoms could not have been picked from these plants. And under even ordinarily good conditions of cultivation, purchasers of this rose may depend upon having equally good results.

HARDINESS. The Noisette class was increased quite largely by crosses with various Tea Roses, and as these hybrids (classed as Noisettes) are tender or only half hardy, many people have the idea that all Noisettes require protection during winter. With the true Noisettes, of which Caroline Marniesse is one, this is not the case. They are perfectly hardy, and the Caroline Marniesse especially may be depended upon to succeed even in severe climates.

THE HABIT OF GROWTH is low and somewhat spreading, making it especially valuable for the borders of beds. It is also very effective for massing in any position. Plants of the right age for transplanting will not have the height of some of the more rampant growing sorts but the amount of blossoms produced will be vastly greater.

THE BLOSSOMS are a pure (or slightly pinkish) white, and are produced in great abundance, the plants often being literally covered with them. They are of medium size, very double and very sweetly tea-scented.

Taking into consideration then, these sterling qualities of hardiness and continuous blooming, which are combined to so high a degree in no other variety, we confidently recommend the Caroline Marniesse to all lovers of that queen of flowers, the Rose.

To the average amateur especially, who, while he appreciates and delights in the beautiful flowers, has little time or study to give to their culture, this Rose will prove a most valuable acquisition.
We do not price our general list, for the reason that we can usually quote better prices when we know the exact wants of a buyer in the various lines or varieties, than we can by pricing items separately. In writing for prices, state quantities wanted as far as possible.

Deutzea, Crenata—2 feet; pure white.
  * Flore Pleno Alba—2 to 3 feet, double, pure white.
  * Gracilis, (Slender Branched)—Dwarf; flowers pure white. The earliest to bloom; fine for pot culture.
  * Pride of Rochester—2 to 3 feet, double white.

Dogwood, Red-branched, (Cornus Sanguinea Variegata)—Leaves broadly margined with white; very showy and striking in contrast to the bright red bark; 2 to 3 feet.

Elder, Golden, (Sambucus Aurea)—3 feet; foliage golden yellow, and retaining its color well throughout the entire season.

Forsythia, Fortunel, (Golden Bell)—2 to 3 feet; about the first shrub to blossom in the spring; golden yellow flowers; very handsome.

Fringe, Purple, (Smoke Tree, Rhus Cotinus)—2 to 4 feet.
  * Tree-form; 3 to 4 feet; extra fine.

A shrub much admired for its curious fringe or hair-like blossoms, covering the whole surface of the plant at midsummer. We have a large and very fine stock this season.

* White, (Chionanthus Virginica)—2 to 3 feet.
  * 18 to 24 inches.
  * 12 to 18 inches.

A handsome shrub with large glossy leaves and drooping racemes of pure white flowers.

Honeysuckle, Hall's Japan (Lonicera Halleana)—Twining, strong two-year-old plants. Flowers are pure white changing to yellow. Very fragrant.

* Monthly Fragrant (L. Belgica)—Twining, strong two-year-old plants. Flowers red and yellow; very fragrant; blooms all summer long; leaves tinged with reddish color. Very fine.

* Scarlet Trumpet (L. Sempereirens)—Twining, strong, two-year-old plants. A vigorous rapid grower; blooms very freely the entire season, bearing trumpet shaped flowers of a bright red color.

Hydrangea, Paniculata Grandiflora—2 to 3 ft. Extra fine well-branched plants.

* 18 to 24 in. Carefully selected stock, and strictly first-class of its size.

* Tree-form or Standard—3½ to 4½ ft. high. Three years old, with heavy trunks and fine, well-branched heads. See cut on back cover.

* Tree-form or Standard—3 to 4 ft. Lighter than the preceding, but very nice stock.

Japan Quince (Cydonia Japonica)—Pink, 18 to 24 inches.

* Red, 18 to 24 inches.

* White, 18 to 24 inches.

Our principal stock is of the Red variety, of which we have some very fine plants.

Lilac, Blanche—Pure white; good sized panicles.

* Charles Xth—Reddish-purple; large, fine trusses; a strong, rapid growing variety, with large shining leaves.

* Marie Legrave—Snow-white; extra large panicles; the favorite white variety for forcing.

* Persian Red—Flowers of a bright purplish-red; leaves smaller and of a different shape than the other kinds.

Have you noticed what Prof. Bailey says regarding the new Japanese Plum, Red June?
Our business is wholesale only. No retail trade for which to save out the finest stock.

Lilac, Purple Common—Good panicles of flowers.

Our lilacs are all well-grown two-year-old plants, about 3 to 4 feet high, varying somewhat according to habit of growth.

Snowball, Common—18 to 24 inches.

        "  Japan—18 to 24 inches.

Spirea, Golden Leaved (Aurea)—2 to 3 feet; fine, well-branched plants.

Syringa, Golden Leaved (Philadelphus Aureo)—18 to 24 inches; an extremely pretty shrub with yellow foliage, and one which keeps its color well during the whole season.

Weigelia, Floribunda—2 to 3 feet. Crimson flowers.

        "  Rosea—2 to 3 feet. Rose-colored flowers.

YOUNG ORNAMENTAL STOCK.

FOR NURSERY PLANTING.

Last season we sold a great deal of this class of stock, and in response to a decided demand for it, have largely increased our propagating facilities. We are now prepared to supply the below items in good quantities, and, at the affixed prices, they should be very profitable investments.

Being Dormant Plants, they can be packed in a very small bulk; can be shipped safely and at small cost to any distance; can be handled and planted with little trouble, and with the assurance that almost every plant will live and thrive.

Ampelopsis Veitchii (Japan Ivy) ........ $4.00 per 100; $30.00 per 1,000.

Six to twelve inches high and nicely rooted. Will make first-class plants in one season, or extra heavy ones in two seasons.

Hydrangea Paniculata Grandiflora ....... $3.00 per 1,000; $20.00 per 1,000.

Extra fine thrifty plants about four to eight inches high and well rooted. The Hydrangea P. G. is one of the easiest of shrubs to transplant successfully, and buyers can depend upon saving almost every plant if handled with even ordinary care.

Snowball Japan (Viburnum Plicatum) ....... $6.00 per 100; $50.00 per 1,000.

Fine six to twelve inch plants, well rooted and healthy. The Japan is as much superior to the common Snowball as a fine H. P. Rose is to a wild one, and we trust that the low price at which we offer this stock will lead to its becoming better known and more freely offered among Nurserymen.

EVERGREENS.

We use the utmost care in selecting this stock for shipment, and our customers can depend upon receiving nothing that is not fully up to the size specified, shapely, healthy, and of good color.

Arbor Vitae, Siberian—18 to 24 inches.

This is very greatly superior to the American Arbor Vitae in that it keeps its vivid green color well during the winter, and in its compact shapely habit of growth.

Wish you could see our Cut-Leaved Birch. Think we could sell you some of ’em then and that’s what we want to do.
We do not price our general list, for the reason that we can usually quote better prices when we know the exact wants of a buyer in the various lines or varieties, than we can by pricing items separately. In writing for prices, state quantities wanted as far as possible.

**Fir, Balsam,** (*Abies Balsamea*)—2 to 3 feet.
" " " " 18 to 24 inches.
" " " " 12 to 18 inches.

A very erect regular pyramidal tree with dark green foliage; grows rapidly and is very hardy.

" Noble's Silver, (*Abies Nobilis*)—6 to 12 inches. Young growth, silvery blue.
" Nordmann's Silver, (*Abies Nordmanniana*)—2 to 3 feet.
" " " 18 to 24 inches.
" " " 12 to 18 inches.
" " " 6 to 12 inches.

This tree, when it reaches fair size, is one of the most handsome and striking evergreens that has yet been introduced. The silvery tinge of the foliage is very pleasing.

**Juniper, Irish,** (*J. Communis Hibernica*)—24 to 30 inches.
" " " 18 to 24 inches.

Of compact dense growth; very ornamental.

**Pine, Austrian,** (*Pinus Austriaca*)—2 to 3 feet.
" Scotch, (*Pinus Sylvestris*)—4 to 5 feet.
" " 3 to 4 feet.
" " 2 to 3 feet.

Both these Pines are rapid growers and are especially useful for windbreaks or similar purposes. Are adapted to poor soils and exposed positions. We have a fine large stock of them upon land that we desire to clear this spring, and for good quantities we can make extremely low prices.

**Spruce, Colorado Blue, (Abies Pungens)—12 to 18 inches.
" " " 6 to 12 inches.

This is one of the hardiest, as well as the most beautiful of Evergreens. The silver blue foliage is of a very decided shade. The seed from which our stock was grown was taken from carefully selected trees of the most marked coloring, which is well perpetuated in these.

" Douglas', (*Abies Douglasii*)—18 to 24 inches.
" " 12 to 18 inches.

This also comes from Colorado. It is of a large conical form; branches spreading; leaves light green above, glaucous below.

" Norway, (*A. Excelsa*)—2 to 3 feet.
" " 18 to 24 inches.
" " 12 to 18 inches.

This is the favorite evergreen for hedges. We have a large and very fine stock in all the above sizes, and are prepared to quote very favorable prices.

**Yew, Upright English,** (*Taxus Baccata var. Erecta*)—18 to 24 inches. An erect, dense growing variety. One of the hardest and finest.

---

**ORNAMENTAL TREES.**

Well-grown thrifty stock.

**Birch, Cut-leaved Weeping**—7 to 9 feet.
" " " 6 to 7 feet.
" " " 5 to 6 feet.
" " " 4 to 5 feet.

Thifty, symmetrical trees; well branched and in every way first-class. Our principal stock is in the middle sizes, which are the most satisfactory for transplanting.

" The wonderful New Rose Crimson Rambler." Has produced 500 blooms on one shoot. Everybody will want it. Have you secured a stock to plant out?

(9)
We will give no reasonable person just cause for dissatisfaction.

Chestnut, American Sweet—5 to 6 feet.
   3½ to 5 feet.
   2 to 3½ feet.

A very handsome ornamental tree, besides bearing much valued nuts.

Horse-Chestnut, White Flowering—6 to 7 feet.
   5 to 6 feet.
   4 to 5 feet.

These are on a piece of land that we desire to clear this spring and will be sold at almost any reasonable price. Only a few of the 6 to 7 foot trees left.

Magnolia, Acuminata—4 to 5 feet.
   3 to 4 feet.

   Speciosa—4 to 5 feet.
   3 to 4 feet.
   2 to 3 feet.

Maple, Ash-leaved (Acer Negundo) Box Elder—7 to 9 feet.
   5 to 7 feet.

   Norway, (A. Platanoides)—8 to 9 feet.
   6 to 8 feet.

   Weier’s Cut-leaved—6 to 8 feet.

Mountain Ash, Oak-leaved—5 to 7 feet.
   4 to 5 feet.

Of fine pyramidal habit; one of the finest lawn trees.

Mulberry, New American—5 to 6 feet.

   Russian—6 to 8 feet.

   Tea’s Weeping—2-year heads, strong and well-branched.
   1-year heads.

   The Tea’s Mulberry is the prettiest of weeping trees. It forms a perfect umbrella-shaped head with long slender branches drooping to the ground parallel to the stem. Our stock has been grown with the utmost care and is more than ordinarily fine.

Poplar, Golden—5 to 6 feet. Keeps its color well.

   Silver—6 to 8 feet.

Thorn, Paul’s Double Red—4 to 5 feet.

   3 to 4 feet.
   2 to 3 feet.

   Double White—4 to 5 feet.

   3 to 4 feet.
   2 to 3 feet.

A fine lot of these highly ornamental trees.

Tulip Tree (Liriodendron Tulipifera)—6 to 8 feet.

   5 to 6 feet.
   4 to 5 feet.

This is a splendid native tree of shapely habit, and bearing handsome tulip-like flowers.

Walnut, Black—9 to 10 feet. Strong fine trees.

Willow, Kilmarnock—2-year heads.

Our Pears are grown on pear land and are beauties. They come out with the roots on them, too.
We do not price our general list, for the reason that we can usually quote better prices when we know the exact wants of a buyer in the various lines or varieties, than we can by pricing items separately. In writing for prices, state quantities wanted as far as possible.

GOOSEBERRIES.

Our land being especially well adapted for producing fine strong Gooseberry plants we have always made them one of our leading lines, growing the American varieties in large quantities. In addition to this, we have now made a very advantageous arrangement with a leading English nurseryman to grow Industry and one or two other of the best English sorts especially for us.

Industry—Fine three-year old plants.

A great deal has been said in regard to this valuable Gooseberry not fruiting very successfully in this country, but our own experience and that of a number of growers whom we have questioned, is quite to the contrary. We find that if the plants are given an occasional spraying with Bordeaux Mixture or Liver of Sulphur, they may be depended upon to produce an abundant crop of the finest fruit.

As stated above, we have effected a very advantageous arrangement with an English nurseryman, one of the most successful growers of this Gooseberry, to furnish us with a large quantity annually. Our stock for next spring has already been received, and we can recommend it as being of the finest quality.

COLUMBUS—Strong two-years old plants.

This is described by the originators as follows: "A new American seedling Gooseberry of the English type. It is of large size, oval in form; skin greenish yellow, smooth; of the finest quality. Plant a strong robust grower with large spines. Foliage large and glossy. Has never shown a trace of mildew. We confidently recommend it as one of the best of its class."

Downing—Strong two-year plants.

Houghton—Strong two-year plants.

Keepsake—Extra fine three-year plants.

This is another English variety and one which we think is destined to become nearly as popular as Industry. It is a straw colored variety of excellent flavor, and is an especially good shipper as it keeps its bloom well, besides being firm enough. It is one of the earliest gooseberries in cultivation, and in England, was fit for picking green on April 30th last spring.

Red Jacket—Strong two-year plants. Only a limited quantity left.

LIGHT GRADE PLANTS.

We have a very few very nice plants of just a little lighter grade than our first-class, in the following varieties, the largest quantity being Smith’s Imp.

COLUMBUS, Red Jacket, Smith’s Improved.

CURRANTS.

We grew a very large and fine stock of currants, but have had such a large trade upon them that our stock and assortment is now much reduced.

TWO-YEAR, FIRST-CLASS.

NOTE.—We can make low prices on Black Champion and White Grape.

We can supply English grown Industry Gooseberries at English prices and they are extra fine stock. Try some "Columbus" and "Keepsake," too.

(11)
Our business has been built up by careful attention to grading. Quality is what counts.

**TWO-YEAR, LIGHT GRADE, very nice stock.**

<table>

<tr>
<th>Black Champion</th>
<th>Black Naples</th>
<th>North Star</th>
<th>White Grape</th>
</tr>
</thead>
</table>

**TREE-FORM PLANTS.**

These are a very taking thing for retail trade. They are trimmed so as to have strong straight trunks, and run from about 2½ to 3 feet high.

<table>
<thead>
<tr>
<th>Cherry</th>
<th>La Versailles</th>
<th>North Star</th>
<th>White Grape</th>
</tr>
</thead>
</table>

**RASPBERRIES.**

We have placed at our disposal by two reliable growers of this place a large quantity of very fine Raspberry plants to be sold for them. Although we assume no responsibility in the matter ourselves, we can recommend the stock very highly. Both of our parties have made a specialty of Raspberries for many years, and have supplied us with many thousand plants, always of the finest quality.

<table>

**Asparagus, Conover's Colossal**—Strong two-year-old roots; carefully straightened and tied in bundles.

**Rhubarb, Myatt's Linnaeus**—Strong selected tubers.

**APPLES.**

Two and three years, none older; straight, well-branched, symmetrical and of good height. The land upon which these were grown had never before been used for nursery purposes, and our blocks are as fine as ever were seen.

**Note.** (†) Indicates first-class trees, ½-inch and up, 5 to 7 feet. (‡) Indicates second-class trees, ½ to ¾-inch, 4 to 5 feet.

*Wilder,

*Clapp’s Beauty‡—A new and very valuable winter Pear. Size medium to large; shape obovate pyriform; skin greenish yellow with distinct red cheek; flesh sweet, tender and fine grained. Tree vigorous, hardy and productive. December and January.

Tea’s Weeping Mulberry is an extremely pretty thing. We have a large stock of fine two-year heads.
Boxes charged at only actual cost which is kept at the lowest possible figure. No charge for cartage, packing or material.

**DWARFS.**

* Indicates first-class trees, 4 inch and up.
* Indicates second-class trees, 2 to 3 inch.
*Bartlett,* *Beurre de Anjou,* *Seeckel*

**PLUMS.**

Our assortment of Plums for this season is very nearly exhausted, we having received during the summer orders for nearly our entire stock.

**Burrank**—4 inch and up, but running largely to ¾ inch trees.

**Red June**—A new Japan Plum that is of great promise. Prof. Bailey of the Cornell Experiment Station, says regarding it: "I have fruited the Red June this year and am certain very much impressed with it. We picked it about the last of July, and it averages almost as large as Bradshaw. It is a good two weeks earlier than Burrank and ten days earlier than Abundance. The quality is about as good, I think, as Abundance. The variety is certainly very much superior to Willard, although a trifle later."

---

**A few specimens of the unsolicited commendations we have received from our customers.**

*Notice this: Not a poor plant among 20,000!*

*From R. G. Chase Co., Geneva, N. Y.:
  "We were well satisfied with the character and grade of the Roses which you shipped us this past spring. Of the 20,000 plants, we were not obliged to reject any."

*From Pitcher & Maxda, Short Hills, N. J.:
  "We have received the Roses in excellent condition, and find them to be excellent stock, far superior to anything we have had in that line before. We would like you to book our order, etc."

*From Chas. Zeller's Sons, Flatbush, N. Y.:
  "The Roses received in good condition and very satisfactory."

*From Youngers & Co., Geneva, Neb.:
  "Your shipment of 100 Empress of China Roses was received in due time in fine condition. The plants are elegant."

*From T. P. Way, Ottawa, Kas.:
  "The roses were very fine indeed, as good as I ever bought."

*From D. M. Moore, Ogden, Utah:
  "Roses at hand in good condition. Thanks. Enclosed find money order, etc."

*From George Crickshanks, Fitchburg, Mass.:
  "Roses received today in good order. While you furnish me with as good stock at favorable terms you will hear from me."

*From Hawks Nursery Co., Rochester, N. Y.:
  "The stock ordered from you has been received, and is very nice—the Queen of the Prairie being as good, we think, as we ever packed."

*From Dingley & Conard Co., West Grove Pa.:
  "When we need to replenish our stock we shall consult your firm, as that hitherto received from you was of the most satisfactory character."

*From A. C. Sabin, Glenwood, Ia.:
  "Enclosed I hand you draft in payment of bill of April 6. The stock was all that I expected, and am much obliged to you for care in shipping and packing same."

Apples will not be so plentiful toward Spring. Place your orders early and, if wanting some fine stock, come to us.
Note.—We do not price our general list, for the reason that we can usually quote better prices when we know the exact wants of a buyer in the various lines or varieties, than we can by pricing items separately. In writing for prices, state quantities wanted as far as possible.

From H. F. Thorup, Salt Lake City, Utah:

"The nursery stock came here about five days ago in good condition. It is very fine and cannot be beaten. Must say that I am well pleased with everything you send us."

From A. F. Langlois, Monroe, Mich., Sec'y of Greening Bros.:

"I thank you for serving me so promptly and so well."

From G. H. Mackall, Achor, O.:

"The plants reached me on time, in good order, and are the best I ever bought."

From G. Klarner, Quincy, Ill.:

"The stock from you has arrived in good condition and is satisfactory. Enclosed is draft for amount of bill."

From C. W. Prescott, Marengo, Ill.:

"I must say that your stock is fine, and in every way satisfactory."

From Jas. Bradley, Roxbury, Mass.:

"I found reason to be well pleased with the stock you shipped this spring."

From Edwin Lonsdale, Philadelphia, Pa.:

"Plants reached me in splendid condition."

From Elm City Nursery Co., New Haven, Ct.:

"The stock you shipped to us arrived in apparent good order, and the grade was all very satisfactory."

From W. P. Rupert & Sons, Seneca, N. Y.:

"Our dealings has been so satisfactory with you in the past, etc."

From A. S. Chadbourne, Hallowell, Me.:

"I was much pleased with those Hydrangeas * * * I shall want to deal with you, I think, more than ever."

From Daniel D. Herr, Lancaster, Pa.:

"Your stock is very fine; none better in the country."

From F. S. Welch, Shenandoah, Iowa.:

"The Currants were as fine as we ever handled."

From Geo. N. Smith, Newton, L. Falls, Mass.:

"Stock received this day in good order. Pear trees are beauties."

From Miller & House, Beebe Plain, Vt.:

"Your stock was very satisfactory."

From S. B. Huested, Blauvelt, N. Y.:

"Your stock pleased me very much, and I shall be glad to receive your spring list early, as I shall want more."

From Des Moines Nursery Co., Des Moines, Iowa.:

"The stock was very satisfactory in every respect. being No. 1 throughout. Same pleased our customers very much, and we thank you for the care and attention given our order."

From Northern Nursery Co., Traer, Iowa.:

"We like to deal with you. Your stock opens up so fine."

From Geo. Young, Supt. and Treas., Glenside Cem. Ass'n, New York Mills, N. Y.:

"The stock arrived yesterday in good order apparently, and I am well pleased with it. Enclosed find postal order to balance account as per invoice."

From Wm. S. Egerton, Supt., Parks, Albany, N. Y.:

"The Pines were first-class and in good condition. They seem to have taken hold and I think I shall not lose any."

From Dan. Wittzel, City Clerk, Oshkosh, Wis.:

"The members of the board are very much pleased with the plants and you may expect an order in the future."

From C. Cooper, Bird-in-Hand, Pa.:

"The two boxes of trees, etc., received yesterday in the best possible condition and stock very satisfactory."
HYDRANGEA PANICULATA GRANDIFLORA. . . . Grown in Standard or Tree Form. This item has been one of our leading specialties for some seasons and we have this season a more than usually fine lot of them. The plant represented above is of the same age and size as those we offer for sale. When trained in this way this Hydrangea makes an extremely handsome and effective shrub for either planting singly or in masses.
